Portfolio

PROJECTS

FullCart

Built a shopping list management web app that utilizes Firebase for viewing, sharing and editing a shopping list in real-time.

Canvas Scripter

Partnered with a Canvas LMS engineer to create a browser extension that enhances functionality for Canvas LMS administrators.

ML Translator

Utilized machine learning models to create a web app that transcribes and translates audio recordings.

EXPERIENCE

Freelance React Developer

Remote
Oct. 2024 - Aug. 2025

Provided freelance development services specializing in ReactJS and full-stack web development for various clients.

Designed and developed a comprehensive project management business website with front-end and back-end functionalities using Next.js, Vite, JavaScript, HTML, CSS, and SQL.

Created detailed mock-ups to visualize website concepts and gather client feedback effectively.

Instructure, Inc

Instructure is a leading education technology company known for its Canvas learning management system, serving institutions globally.

Technical Support Engineer

Remote
Jun. 2021 - Jul. 2024

Performed Canvas API calls to resolve complex technical issues and provided advanced support.

Instructed customers on creating HTML, CSS, and JavaScript customizations for their courses, achieving a 96% average customer satisfaction rate.

Diagnosed and resolved complex technical issues related to CSV imports, assessments and API integration with a 98% first-contact resolution rate.
